Comfortable indoor ventilation

Prices 2023 - Sales International

always the best climate

ALWAYS THE BEST CLIMATE

“We strive to improve the quality of life by providing the finest indoor climate solutions.”

Excellent team
Every day we combine passion, expert knowledge and commitment to give you the best results.

Great solutions, products and services
Great products and unique service for an energy-efficient, healthy and comfortable indoor climate.

WE ARE THE SPECIALISTS FOR A HEALTHY, COMFORTABLE AND ENERGY-EFFICIENT

The broad and clearly structured portfolio from the Zehnder Group is split into five product lines. Consequently, we can provide our customers with the right product, perfect system and matching service for all types of projects – from new build to renovations, single or multi-occupancy homes, as well as commercial projects. This variety ensures that our wealth of experience is continuously expanding, providing tangible added value to our customers on a daily basis.

Comfortable indoor ventilation
Our comfortable indoor ventilation is energy-efficient and provides a healthy indoor climate. It promotes the wellbeing of the occupants and increases the value of the property.

OUR BRAND REPRESENTS INNOVATION, QUALITY AND DESIGN

zehnder

The Zehnder brand offers excellent indoor climate solutions within the product lines of decorative radiators, comfortable indoor ventilation, heating and cooling ceiling and clean air solutions.

First choice for customers
Always close to the needs of our customers, to grow with you and overcome all challenges together.

INNOVATION OVER 5 GENERATIONS

MANUFACTURER OF THE WORLD'S **1st** STEEL AND BATHROOM RADIATORS

REPRESENTED IN MORE THAN **70** COUNTRIES

AROUND **3,500** EMPLOYEES

17 OF OUR OWN PRODUCTION PLANTS IN EUROPE, NORTH AMERICA AND CHINA

INNOVATION SINCE **1895**

AROUND **40,000** TRAINED CUSTOMERS PER YEAR

900 PATENTS AND DESIGN RIGHTS THROUGHOUT THE WORLD

INDOOR CLIMATE

Decorative radiators
Our individual decorative radiators make every room – wether at home or in commercial or public buildings – not only warmer, but also more attractive. They combine iconic design with outstanding comfort experience.

Heating and cooling ceiling
The ceiling is the perfect place to supply a room with convenient heating and cooling. Energy-efficient climate via radiant panels work perfectly with our suite of solutions from office to manufacturing spaces.

Clean air solutions
Air cleaning systems from Zehnder effectively reduce the amount of dust and other particles in the air. The result: clean working environments, significantly improved employee health and enhanced business performance.

BEST QUALITY CERTIFICATES

Zehnder Group products are frequently awarded prizes for design and innovative technology.

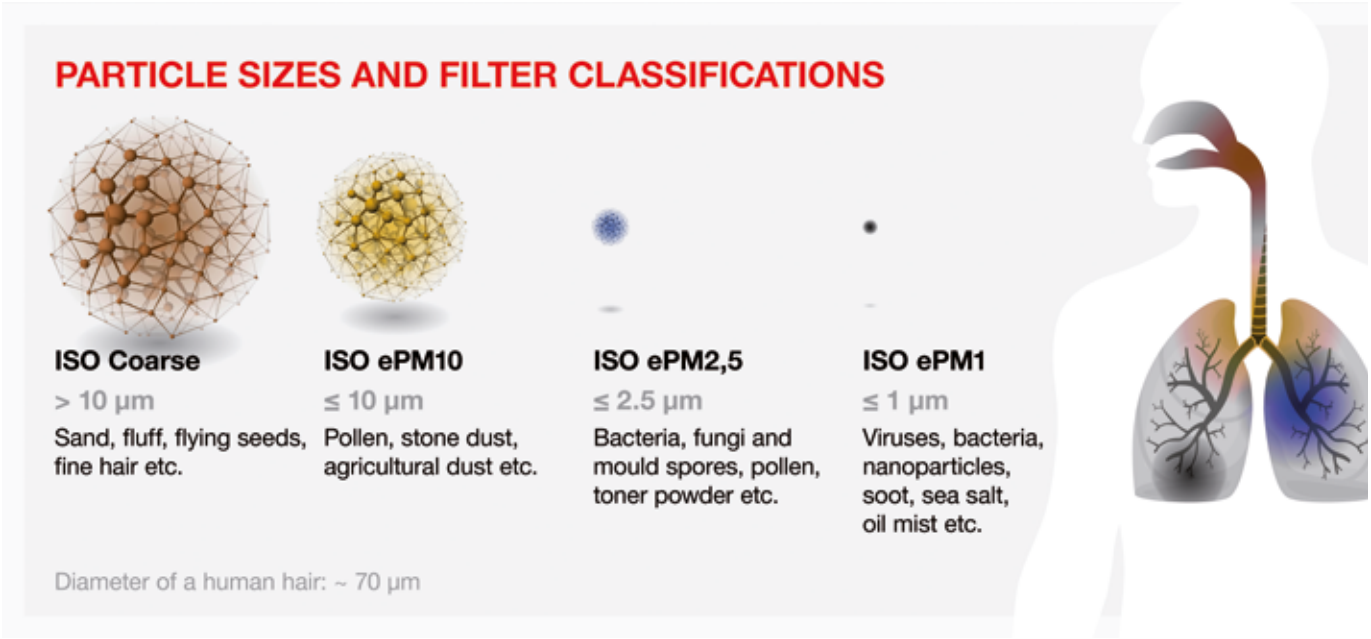
Be sure with Zehnder original filters to the new ISO 16890 air filter standard

Zehnder ventilation units provide rooms with a permanent supply of fresh and healthy air. The original filter in your ventilation system plays an important role here. In order to better evaluate filter performance, the standard that tests filter performance has now been adapted.
The ISO 16890 air filter standard has superseded the previous standard, EN 779, with regard to filter assessment and classification since January 2017 and comes into force in its entirety as of 1 July 2018.



Particle sizes and filter classification according to the new ISO 16890 air filter standard

+ ISO 16890 AT A GLANCE

Realistic assessment of filters

- ISO 16890 replaces the EN779 standard, whereby only a single particle size of 0.4 µm was used to assess filter performance
- Fine dust, such as soot or pollen, however, comes in different sizes, which are often invisible to the naked eye
- ISO 16890 now divides filters into four classes that filter a certain particle span out of the air
- To be assigned a category, a filter must separate at least 50% of the respective particle sizes.

+ NEW NAME – SAME HIGH PERFORMANCE

With Zehnder, you can make the perfect choice for an ideal indoor climate every time. High performance is a given when it comes to the development of our original filters. Due to the perfect coordination of the ventilation system and the original filter, the required standards had already been met even before the introduction of the new ISO 16890 air filter standard. So essentially only the name of our filters has changed – but the performance is still the same.

- With the ideal combination of ventilation system and original Zehnder filters, you can be assured.
- This means that our filter set for Zehnder ComfoAir Q, for example, is no longer called F7, but instead ISO ePM1 greater than or equal to 50%.

The energy efficiency label

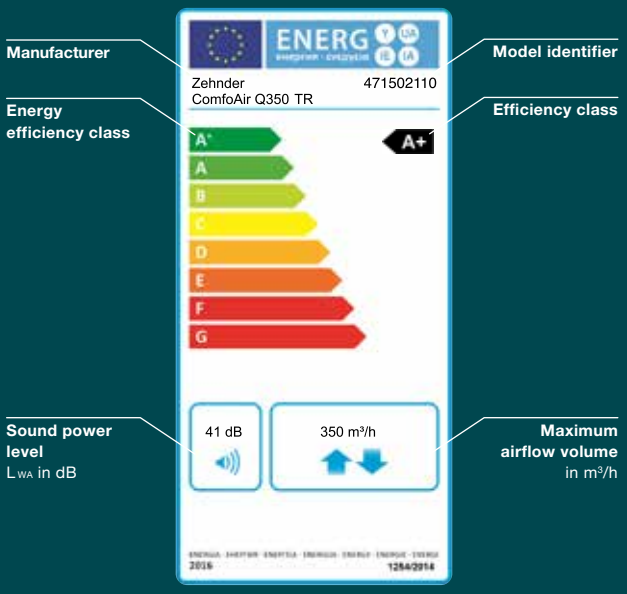
The energy efficiency marking for comfort ventilation units that was introduced in January 2016 offers you and your customers more information and transparency as well as better guidance with regard to quality and efficiency.
For Zehnder, the label signifies a confirmation of the high standards of energy efficiency for products and systems. It also benefits end users going forward, as they continue to choose ventilation units which combine the very best results with maximum functionality.

What is the significance of the energy efficiency label?

At a glance:

- Alphabetic classification in energy efficiency classes from A+ to G
- Parameter for specific energy consumption (SEC): annual power consumption minus annual energy saving
- Most Zehnder units for central comfort ventilation have been classified as A+. Airflow volume, heat and humidity recovery, fans and the control unit all affect the energy efficiency class.

The energy efficiency label



SEC class	SEC in kWh/m²·a
A+ (highest efficiency)	SEC < – 42
A	-42 ≤ SEC < -34
B	-34 ≤ SEC < -26
C	-26 ≤ SEC < -23
D	-23 ≤ SEC < -20
E	-20 ≤ SEC < -10
F	-10 ≤ SEC < 0
G (lowest efficiency)	0 ≤ SEC

A SEC of 0 is equivalent to window ventilation. A SEC of -42 indicates primary energy savings of 42 kWh/m² a.

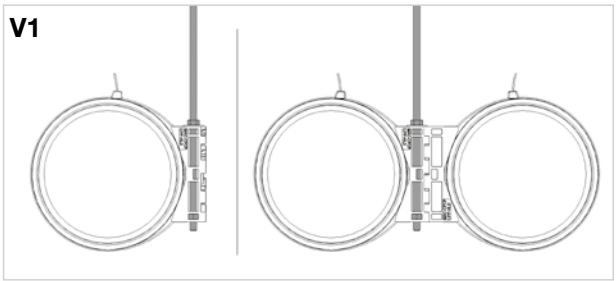
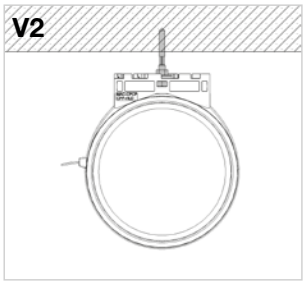
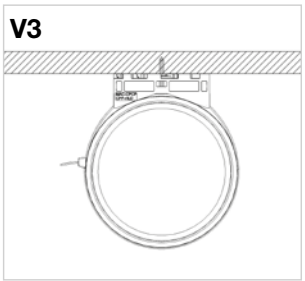
How ComfoFix Link can be applied.







ComfoWell

Zehnder ComfoWell, the modular system for silencers, filters and distribution manifolds.

All components within a width can be directly connected to and combined with one another.
Components can be used as a duct installation, in combination (e.g. silencer + silencer or silencer + manifold box) or directly on the ventilation unit.
For example combinations, see page 49 onwards.

The system consists of five widths:

- 220 series for 4 connectors and max. 160 m^3/h at a normal ventilation level for ComfoTube 75 or 90
- 320 series for 6 connectors and max. 240 m^3/h at a normal ventilation level for ComfoTube 75 or 90
- 420 series for 8 connectors and max. 320 m^3/h at a normal ventilation level for ComfoTube 75 or 90
- 520 series for 10 connectors and max. 400 m^3/h at a normal ventilation level for ComfoTube 75 or 90
- 625 series for 12 connectors and max. 480 m^3/h at a normal ventilation level for ComfoTube 75 or 90

Modular plastic in- and onfloor manifold box Zehnder ComfoCube Flex

Modular plastic in- and onfloor manifold box Zehnder ComfoCube Flex suitable for connection of air ducts for intake and exhaust air up to 300 m^3/h.

The manifold box can be assembled from single modules according your needs.
The single modules will be connected on-site with clamping strips.

Insulated Air distribution system

thermalshield by zehnder

ComfoTube Therm
The Zehnder ComfoTube Therm insulated ventilation tube impresses with optimum sound and heat insulation properties for the perfect feel-good climate at home. This makes the ComfoTube Therm the ideal solution for the condensation-free transport of warm and cold air. Thanks to high-quality insulation, the temperature-controlled air is passed through the ventilation tube with almost no temperature loss, so that living spaces can be cooled and heated as required in an energy-efficient manner. The Zehnder ComfoFit Therm insulated connectors, made of expanded polypropylene (EPP), complete the portfolio to form a continuously insulated air distribution system, which is a component of the Zehnder ComfoClime room climate system solution.

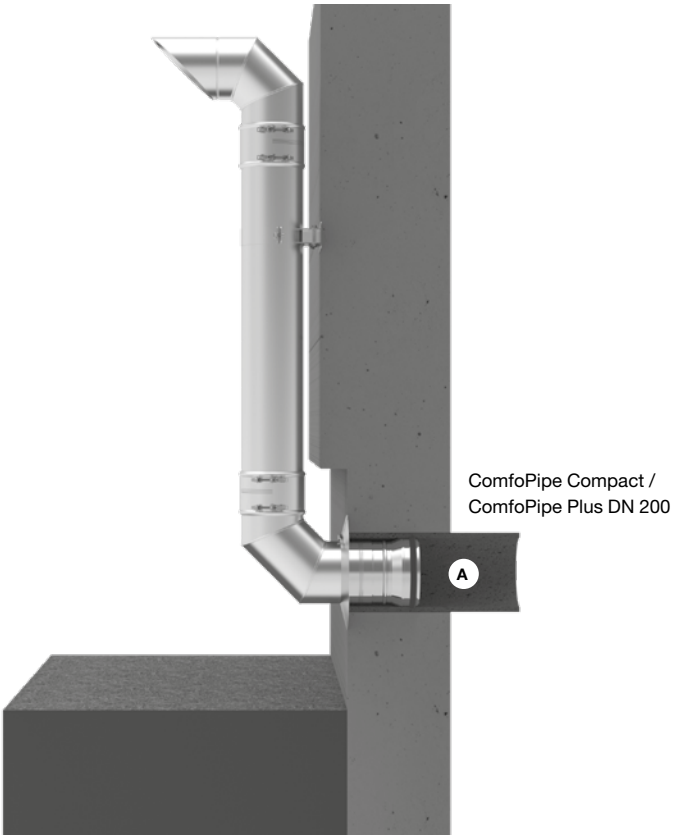
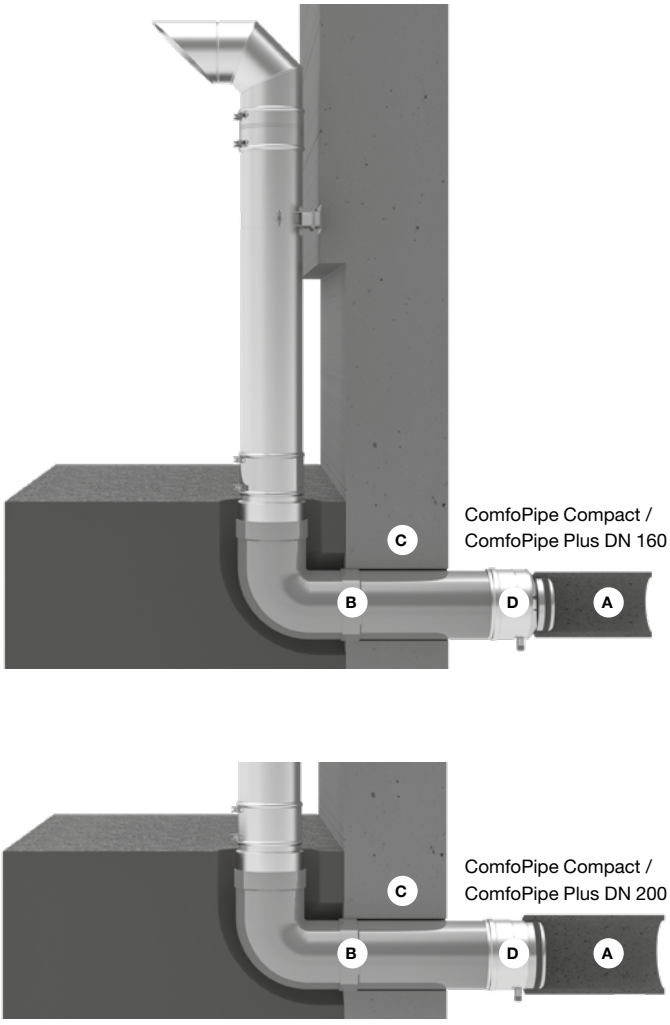
Example applications for the ComfoVent facade system

1 ComfoVent 180 System 1
above ground level



2 ComfoVent 180 System 2
under ground level



- A ComfoPipe Compact / ComfoPipe Plus
- B Underground line DN 200 (on site)
- C Wall duct, resistant to pressurised water if necessary (on site)
- D Condensation drain with adaptor for ComfoPipe Compact / ComfoPipe Plus

Facade system

Product	Description	PU 1	PU 2	Article no.	Gross price €	Discount group
ComfoVent						
1 	**Facade system 1** for air flow of the outdoor air or exhaust air above ground level and for connection to ComfoPipe Compact / Plus, material stainless steel Set consists of: 1 x outdoor air bend (with seal and clamp fitting) 1 x length element L = 1080 mm (with seal and clamp fitting) 1 x 90° bend with seal 1 x wall bracket (adjustable 50-90 mm) 1 x adaptor DN 180 to ComfoPipe Compact /Plus DN 200 1 x wall rosette **ComfoVent 180 system 1** **to ComfoPipe Compact / ComfoPipe Plus DN 200,** above ground level *EAC-CV-DN180/200-CPCP-SET1* **Note:** Going through the wall, ComfoPipe Compact DN 200 (990 328 696) or ComfoPipe Plus DN 200 (990 328 720) must be used (not included). Is a connection DN 160 coming from the ventilation unit intended, a reduction adaptor (990 326 349) can be used as transition from ComfoPipe Compact / Plus DN 200 on to ComfoPipe Compact / Plus DN 160.	**1**	**2**	**990 430 740**	**947,20**	**C**
2	**Facade system 2** for air flow of the outdoor air or exhaust air via on-site plastic tube laid in the ground and for connection to ComfoPipe, material stainless steel Set consists of: 1 x outdoor air bend (with seal and clamp fitting) 1 x length element L = 1080 mm (with seal and clamp fitting) 1 x junction to plastic tube DN 200 1 x condensate drain with adaptor to ComfoPipe Compact / ComfoPipe Plus with seal 1 x wall bracket (adjustable 50-90 mm) **ComfoVent 180 system 2** **to ComfoPipe Compact / ComfoPipe Plus DN 160,** below ground level *EAC-CV-DN180/160-CPCP-SET2* **ComfoVent 180 system 2** **to ComfoPipe Compact / ComfoPipe Plus DN 200,** below ground level *EAC-CV-DN180/200-CPCP-SET2* **Note:** Earth-laid, hygienically safe, as air duct suitable plastic pipe DN 200 is not included in the scope of dilivery and must be provided on site.	**1** **1**	**2** **2**	**990 430 741** **990 430 742**	**947,20** **947,20**	**C** **C**
